

Full Calendar

1 OVERVIEW

Demonstrates how to use the FullCalendar extension and StyleSheet extender in a split container together with the a toolbar and the MonthCalendar control.

2 WHAT TO LOOK FOR

- Setting a cool background for the ToolBar.
- Using the StyleSheet extenders to add CSS styles to the application. This sample uses the CSS classes to style the event objects on the FullCalendar and the ComboBox items.
- ComboBox with HTML items.

3 HOW TO CREATE YOUR OWN

Drop the FullCalendar extension on a form or a page, Wisej will automatically add the reference and include the extension into your project.
