

## User Paint Cells

### 1 OVERVIEW

---

Demonstrates how to custom draw any content in any cell in a DataGridView control.

### 2 WHAT TO LOOK FOR

---

- Using a background image on the main page.
- Drawing a small chart inside a cell using the System.Web charting control.
- How to update the style and drawing of a UserPaint cell calling cell.Update().

### 3 HOW TO CREATE YOUR OWN

---

Set the UserPaint property on a DataGridViewColumn or on a single DataGridViewCell object to true and handle the DataGridView.CellPaint event. Any cell in any column type supports the UserPaint feature.
